EDUCATION

San Jose State

Bachelor of Science in Data Science

San Jose, CA

Graduating May 2027

WORK EXPERIENCE

AGMNT

Founder | **NextJS, Supabase, Headless, Python, Shopify, Stripe**

San Ramon, CA

March 2024 – Present

- Creating an AI analytics and agentic decision platform for fashion companies, leading product strategy, frontend development, and API integrations.
- Designing multi-tenant **Supabase PostgreSQL** architecture with row-level security supporting 6 consulting clients across isolated **Shopify** and **Stripe**.
- Operating a luxury fashion retail channel partnered with 10 emerging brands including: **Post Archive Faction, AVAVAV, Xlim, and Kozaburo**. Generated **over \$20K in revenue and grew to ~20K following on Instagram in under a year**.
- Invited to New York, Paris, and Milan Fashion Week, building direct relationships with designers and leveraging firsthand buyer behavior and trend data to inform platform feature development, client acquisition, and buying decisions.

Jay Pinson STEM Education Program

Researcher

San Jose, CA

Feb 2024 – May 2024

- Applied EDA, statistical testing, clustering, and regression in Python, SQL, and R to uncover trends in student engagement and academic performance across STEM curriculum evaluations.
- Developed visualizations and reports in R and Excel to communicate findings to stakeholders, directly informing personalized curriculum design across K-12 classrooms.

PERSONAL PROJECTS

Analytics Dashboard

Jan 2026

- Ingests real-time data from **Shopify, Stripe, Salesforce**, and **Sanity CMS** into a unified **PostgreSQL** schema powering Sales, Inventory, Shipping, and Production dashboard modules with filterable charts and SKU-level analytics.
- Built role-based team access (Admin, Manager, Viewer) with invite flows and activity logging, supporting multi-user organizations on a shared data layer.

Brand Intelligence ML Agent

Feb 2026

- Building a semantic context layer that ingests transactional, marketing, and engagement data from **Shopify, Google Analytics, Instagram, and Salesforce** to inform a **GLM-5**-powered brand intelligence agent capable of generating per-SKU demand forecasts with confidence scores.
- The agent surfaces pricing recommendations, influencer collaboration opportunities, ad-spend optimizations, and scarcity drop strategies as prioritized, actionable insights within a client-facing dashboard.

AGMNT Retail Site

August 2025

- Built the company's public-facing site on **Next.js** and **Vercel** with **Supabase backend**, integrating the **Shopify Headless API** to decouple storefront presentation from commerce logic for full client branding control.
- Implemented SSR and dynamic routing for SEO optimization, delivering fast load times and a responsive storefront experience across all devices, while having been able to handle over **1000+ monthly visitors**.

Fashion Marketplace Data Scraper

June 2024

- Built a scraper targeting Grailed using **Playwright** with persistent cookie session management, enabling keyword-targeted **collection of 100,000+ active and sold listings** across luxury and streetwear markets.
- Engineered an ETL pipeline normalizing raw JSON to structured CSV, capturing Grailed sold data unavailable via public API to produce a proprietary resale pricing dataset.

Technical Skills

Languages: Python, Java, JavaScript, TypeScript, SQL, HTML/CSS

Frameworks & Tools: PyTorch, Vercel, React, Next.js, Node.js, Docker, NoSQL (MongoDB, Firebase), PostgreSQL, Supabase, Shopify GraphQL API
